Missouri Pond Handbook - Missouri Department of Conservation

A wildlife pond is one of the single best features for attracting new wildlife to the garden. It is thought that some amphibians, such as frogs, are now more common in garden ponds than in the countryside. You can build a pond at any time during the year, but if you start in autumn or late winter, it will get established much quicker.

How to build a pond | The Wildlife Trusts

The best ponds for wildlife have shallow margins with a fringe of vegetation and nearby plant cover for amphibians and insects with terrestrial life stages. Why is it like this? Many ponds are artificial and were originally dug for marl (a lime-rich clay spread on fields to reduce acidity) or to provide a water source for livestock.
